The purpose of this course is to present the student with the key vocabulary needed to understand the theory and practice of information management. Students are provided with a strong foundation of information management and research skills needed to be a successful business information specialist. Throughout the course, the instructor will use real world examples and case studies to demonstrate how concepts are applied to solve real world problems. This course will provide the foundation for students who desire to become a Certified Library Information Specialist (CLIS). Through a series of short lectures, a focused workshop, and a comprehensive portfolio case, we will build upon foundational concepts through practice. Case studies, PowerPoint presentation, and a review of the PowerPoint slides will demonstrate how to analyze information management and information systems issues in the context of your organization and the marketplace. This course is based on the successful Library Information Specialists degree. The goals of this course are to: 1) present core concepts and

Doc-O-Matic Professional Crack Activation Key For PC
