A method for the identification of *Listeria monocytogenes* on the basis of the polymerase chain reaction (PCR) has been developed. We used primers for the detection of both 16S and 23S rRNA genes in bacterial cells. Amplification was performed in two steps using primers L9, L21, L24, L34, L38, L41, L49 and H102, which are specific for the 16S rRNA gene and specific for the 23S rRNA gene, respectively. Among the bacterial strains tested, which were *Listeria monocytogenes* and non-*Listeria* isolates, those of the *Listeria* spp. produced products of expected size. However, no PCR product was obtained with the non-*Listeria* species. This suggests that the method we propose is very reliable and specific for the identification of *L. monocytogenes*. Easy-to-handle GUI Operating system independent Internet connection type support Save files to the hard disk Chilkat is a pretty small software application that was developed specifically to make your Internet Explorer browser work faster, regardless of the your Internet connection type. Easy-to-handle GUI You are met by a minimalistic interface which encloses all the available options in the main window. As a result, it is only comprised of a few buttons and a small drop-down menu, and it is possible for both beginners and highly experienced people to find their way around it, without facing difficulties, although there are no Help contents. Options you can work with First and foremost, you should know choose the type of Internet connection (e.g. modem, LAN, ISDN, CATV, Cable etc.) you use from the aforementioned drop-down menu bar or just let the program automatically detect it. You can make Internet Explorer run faster by simply clicking the "Accelerate!" button, while it is also possible to stop it in a similar manner. It is also possible to view the pages you have currently opened in the web browser and send the utility to the system tray, so that it does not become obtrusive. Conclusion and performance It does not require a large amount of CPU and memory resources in order to function properly, while the response time is quite good. All things considered, we can safely say IE Accelerator is a decent piece of software, dedicated to people who use Internet Explorer as a default web browser and want their download and surfing speed increased. It comes with a pretty intuitive design, yet it is not very easy on the eyes.
